

# Typical Daily Calorie Requirements Before and After Weight Loss (continued)

According to our research at Tufts, energy requirements after weight loss are slightly lower than those for the same body weights before weight loss. For example, the daily requirement for a 5'10", 150-pound man with a sedentary lifestyle is 2,354 calories before weight loss and 2,118 calories after weight loss.

## Men: Calorie Requirements After Weight Loss at Age 40
